Bio

Hey, my name is Simon! 🌟

I'm a full-stack developer (javascript/node/ruby) with an expertise in front-end (react/vue).

I'm highly motivated, have a strong work ethic and think along with your company. Not only to help solve software-related problems but also in creating checklists, automating repetitive work and organising information for others to reduce waste of resources (time, energy & money).

I'd describe my personality as creative, organised, analytical and calm. If you'd believe an MBTI-test, it would label me as an INTJ. Currently interested in open source artificial intelligence and decentralised public financial infrastructure development.

My Specialities 🧑‍💻

HTML, CSS, Javascript, React/Vue, Typescript, Node, Ruby, Rails, Gatsby, Contentful, Jenkins, Docker, WordPress & Bash scripting. What I lack in skills or don't understand yet, I can figure out pretty quickly.
